Treatment for wasps

Phone 020 7364 5007 (weekdays 8am to 8pm, Saturday 8am to 4pm) and we will make an appointment to visit you.

On the visit, we will apply insecticide powder around the wasps' entrance and exit for their nest, or spray the nest directly if it is accessible.

See if you qualify for a [free service](#) or find out [how much we will charge](#)

Dealing with wasps yourself

- This is not advised, as these can be dangerous especially to someone allergic to wasp stings.
- Nest locations can also be high or difficult to reach, so there is a risk of falling and injury.
- We recommend seeking professional advice and treatment.
