

Course Title

Exploring Early Years

Open Afternoon:

- We will explore how providing a stimulating and safe environment is essential for children to be able to develop.
- See our whole school community learning together.

Target Audience

This training is suitable for all new to Early Years and Foundation Stage practitioners and Students.

Course Objectives:

- To explore engaging children through developing their interests, supporting their participation and involvement.
- Planning for and observing within facilitating environments which encourage children's individual ideas and development.
- To develop the partnership with parents to support and inspire new learning.
- To enable children to have the freedom and opportunity to communicate, create and think critically.

Practitioners will observe Early Years staff

- Helping young children to settle into their **new environment**.
- Recognising the importance of children learning in an environment that encourages **exploration** and **active learning** experiences.
- Encouraging **parental involvement** – developing positive experiences with shared experiences
