

Fleas

	Flea
Photo courtesy of Bayer Environmental Science	
Colour	Brown
Size	Average $\frac{1}{10}$ inch (2 – 3 mm)
Symptoms	Itching or bite marks (small and red)

Treatment for fleas

Phone 020 7364 5007 (weekdays 8am to 8pm, Saturday 8am to 4pm) and we will make an appointment to visit you.

On the visit, we will spray floors, carpets and skirting boards with insecticide.

IMPORTANT – The treatment will be more successful if you vacuum the area beforehand, and then empty the cleaner or bag.

IMPORTANT – Do not vacuum clean treated areas for seven days after treatment, which would remove the pesticide.

See if you qualify for a [free service](#) or find out [how much we will charge](#)

Dealing with fleas yourself

If you decide not to use our service or want to take action before your appointment, there are alternatives:

- Anti-flea powder insecticides and sprays are available from hardware shops or Veterinary practices.

Preventing fleas coming into your home

- Regular treatment of pets with specific anti-flea drops from a vet is most effective, and treatments are also available at pet shops.
