1 Proposed Demolition - Section
1 : 100

Front section of walkway (marked in red on the above photos) to be brought back 2.8m in line with existing concrete columns. The above walkway will still have a decent width beyond existing flat entrance recesses. This will also allow for the new flats on the ground floor to be set back from the street and have a more secluded entrance and ultimately better illumination to the habitable rooms.

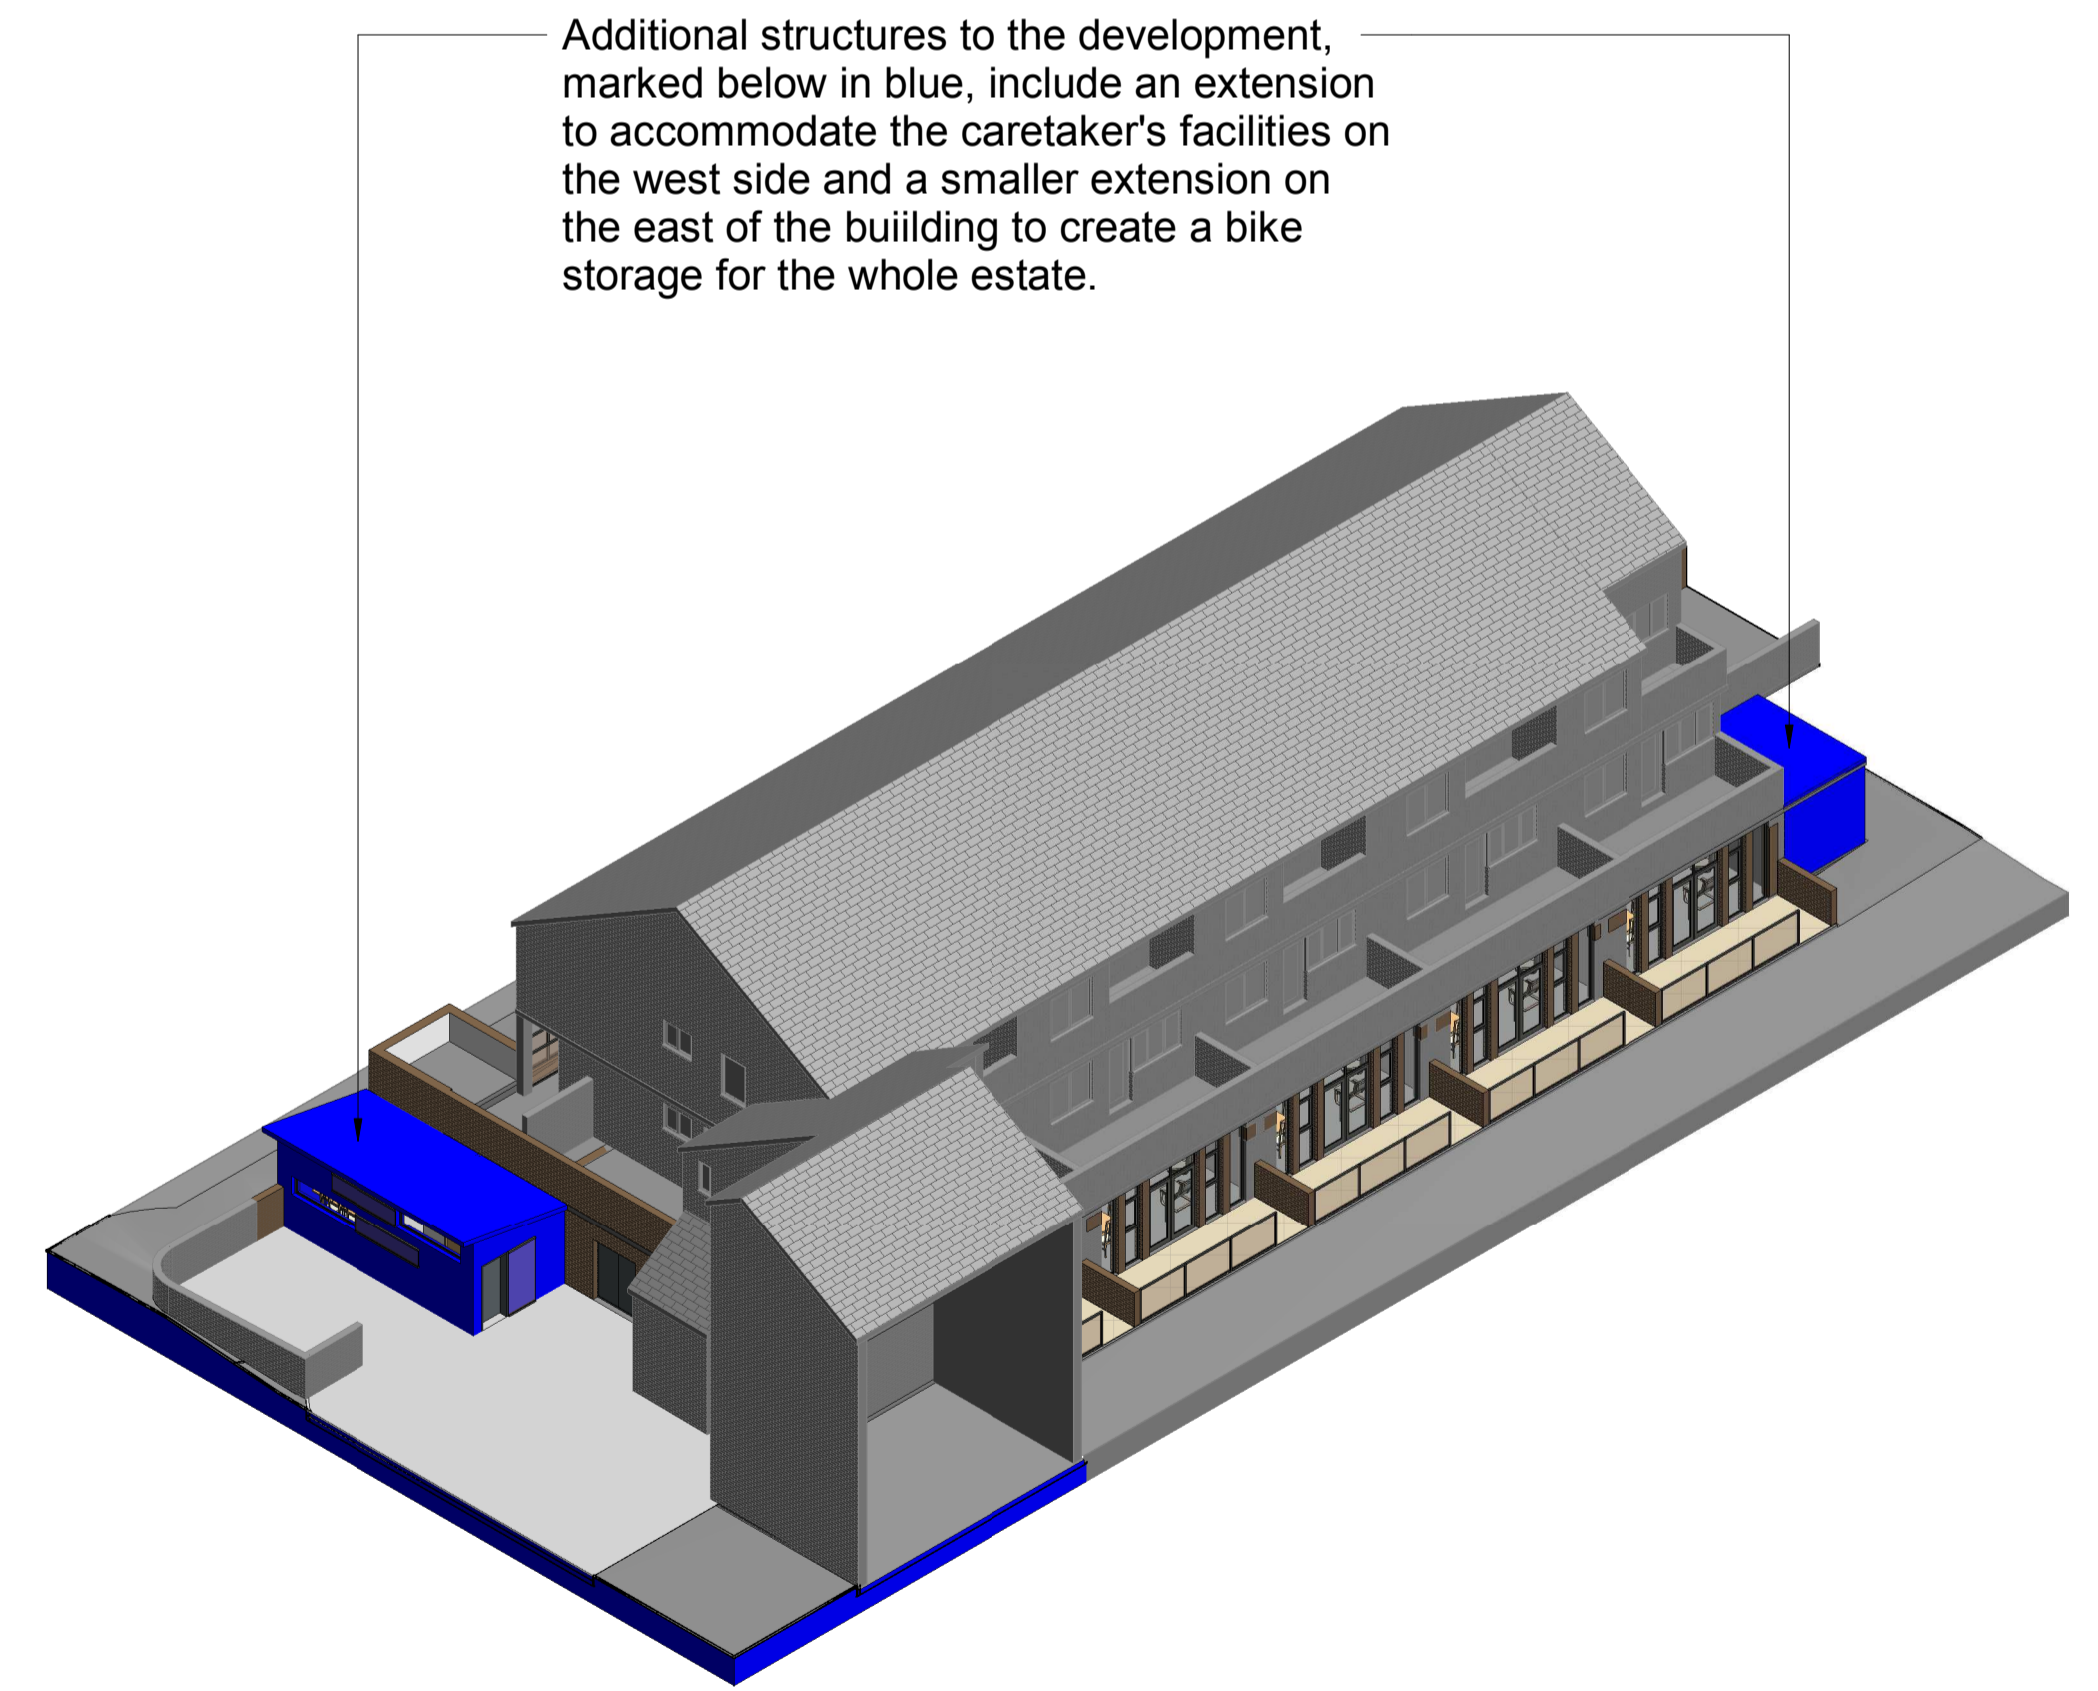

2 Demolition Works - Front

3 Proposed Works - Front

4 Demolition Works - Back

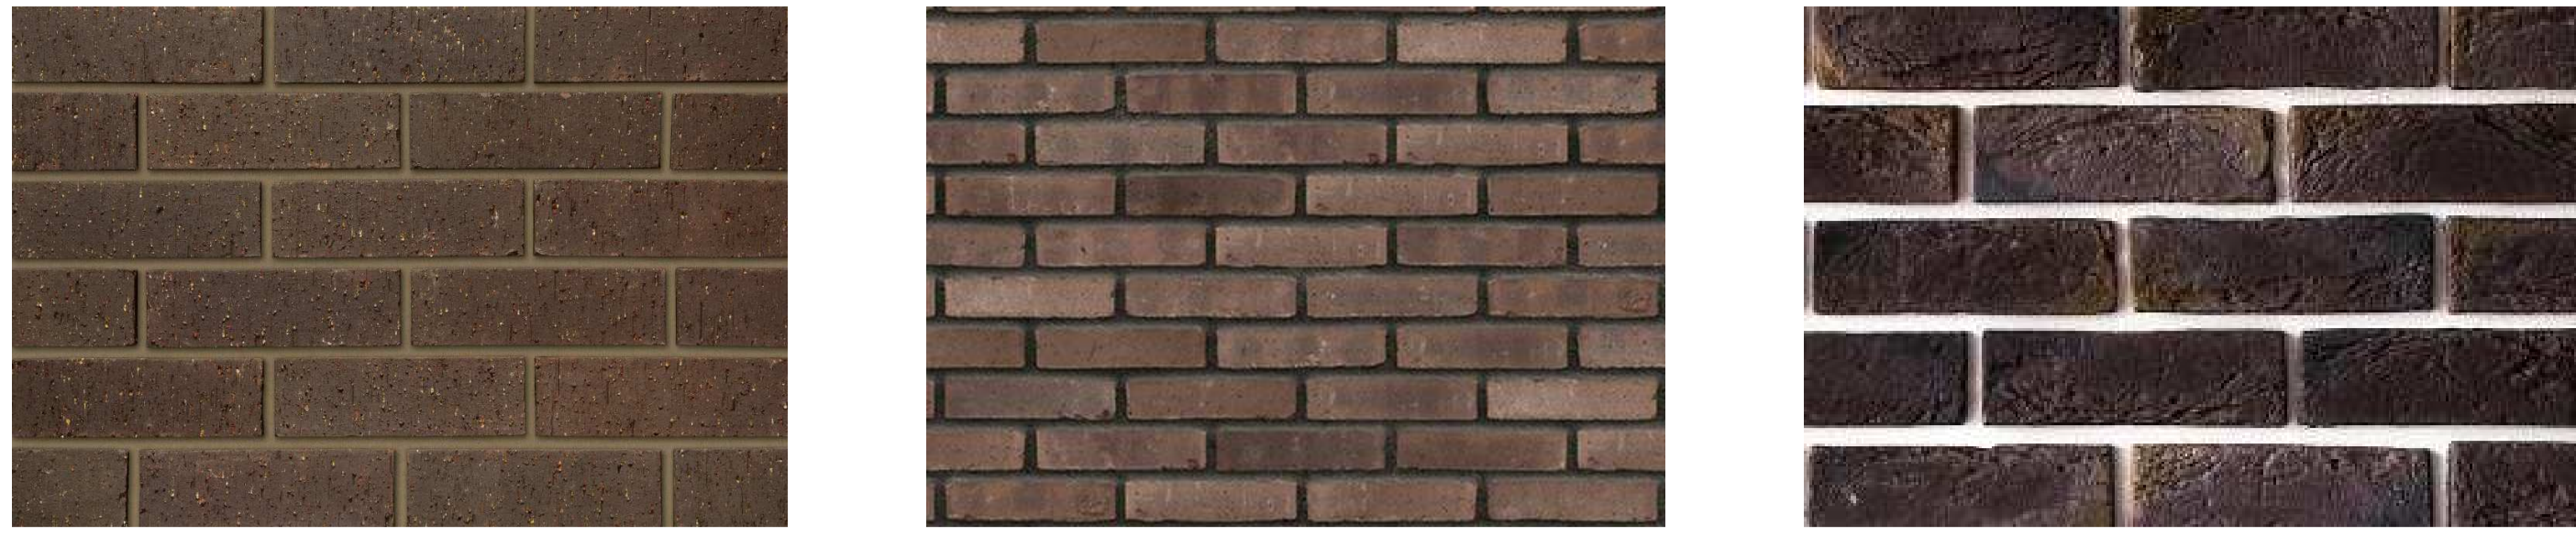

5 Proposed Works - Back

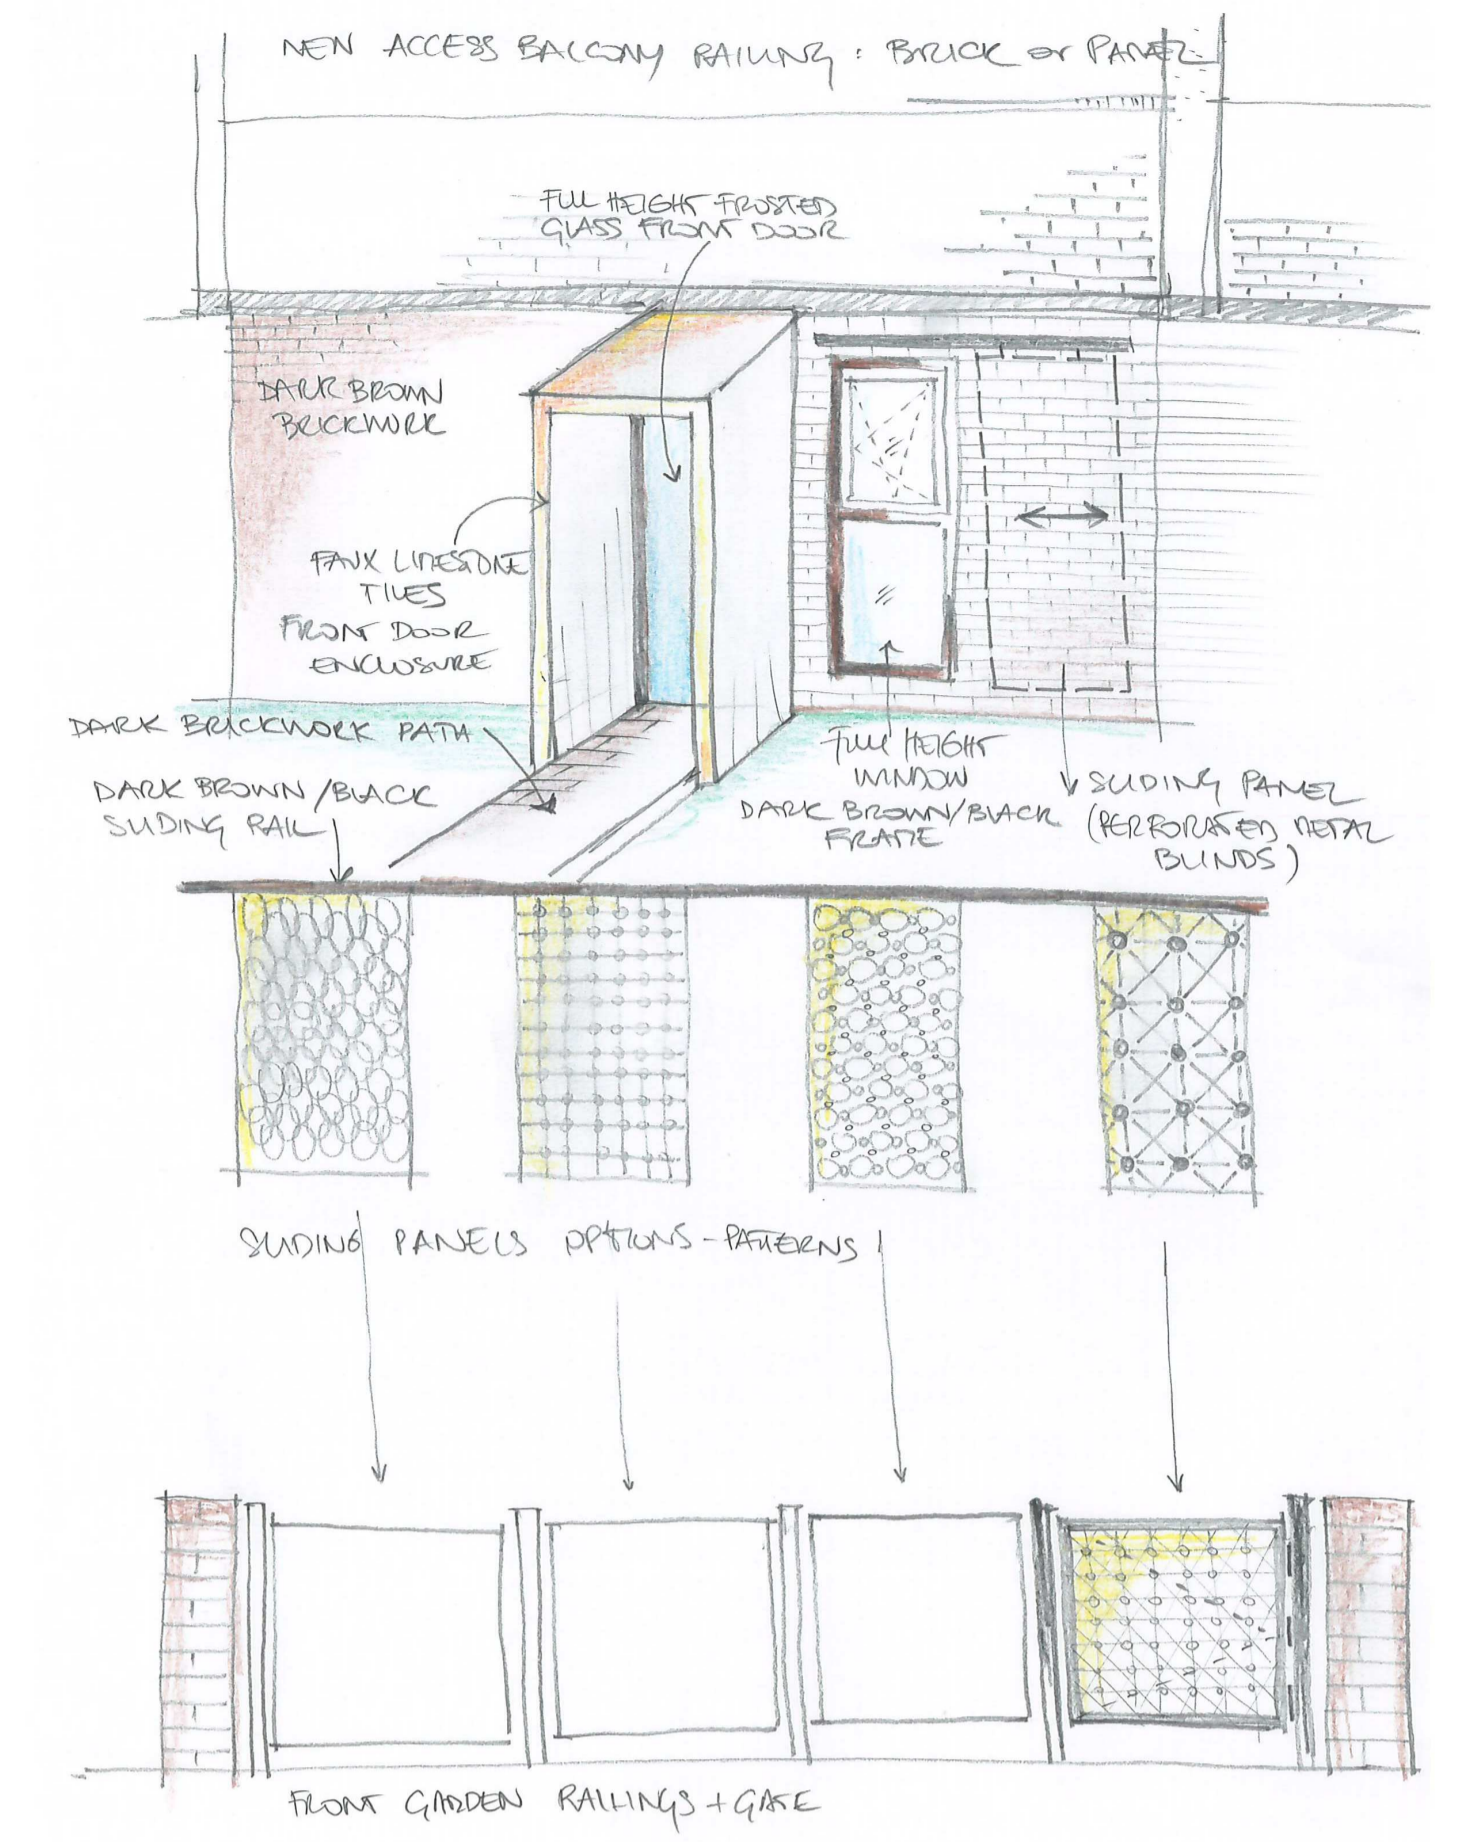

Additional structures to the development, marked below in blue, include an extension to accommodate the caretaker's facilities on the west side and a smaller extension on the east of the building to create a bike storage for the whole estate.
